8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: The company started the machine testing and trial gold production last year and has continued to drive the trial gold production program. In addition to the USD 200,000 loan the company has received on 24 November 2021, the company will continue to invite potential partners or investors to inject cash or provide machinery and equipment for the project.

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: The company has continued to drive the trial gold production program. If successful, this would result in the company being able to achieve a stable and continuous revenue stream from the second half of the year as it also expands its production capacity moderately in the future.

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

SOON MINING LIMITED (ASX: SMG)

**QUARTERLY ACTIVITIES REPORT
FOR THE QUARTER ENDED 31 MARCH 2022**

Kwahu Praso Project (100% SMG)

During the quarter, Soon Mining Limited ("SMG" or the "Company") continues its trial gold production program at its flagship Kwahu Praso project in Ghana.

Due to the relaunch of the "Operation Halt" by the Ghana government, the Company encountered the force majeure factors during the trial gold production program this quarter. In order to regulate mining activities for environmental sustainability and management, the Ghana government is making unprecedented efforts to halt illegal mining. Therefore, all legitimate/legal large-scale mining companies in Ghana were required to suspend mining work when requested by the Ghana government to allow the government to investigate illegal mining.

Overall, the Company has achieved stable results in setting up machinery and equipment in its trial gold production. However, the gold grade in the trial mining area were not to the quality expected and as such the Company is now looking at other areas with higher gold grade for mining.

In terms of working capital, the last major funded received was the USD 200,000 loan received in November 2021. The Company continues to invite potential partners or investors to inject cash or provide machinery and equipment for the on-going and upcoming projects.

SMG expects to increase the activities in its gold trial production program to try to meet operational goals. It is hoped that soon, the Company can officially conduct large-scale mining after reaching the goals of trial production.
